

Remote Control Spreader Bar

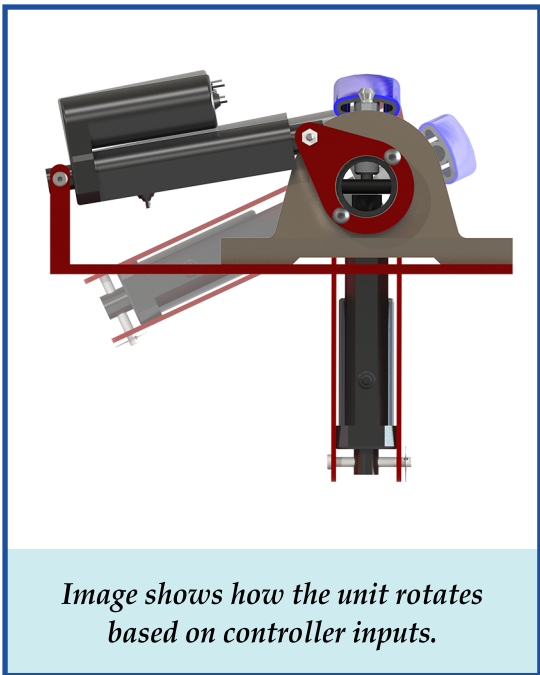

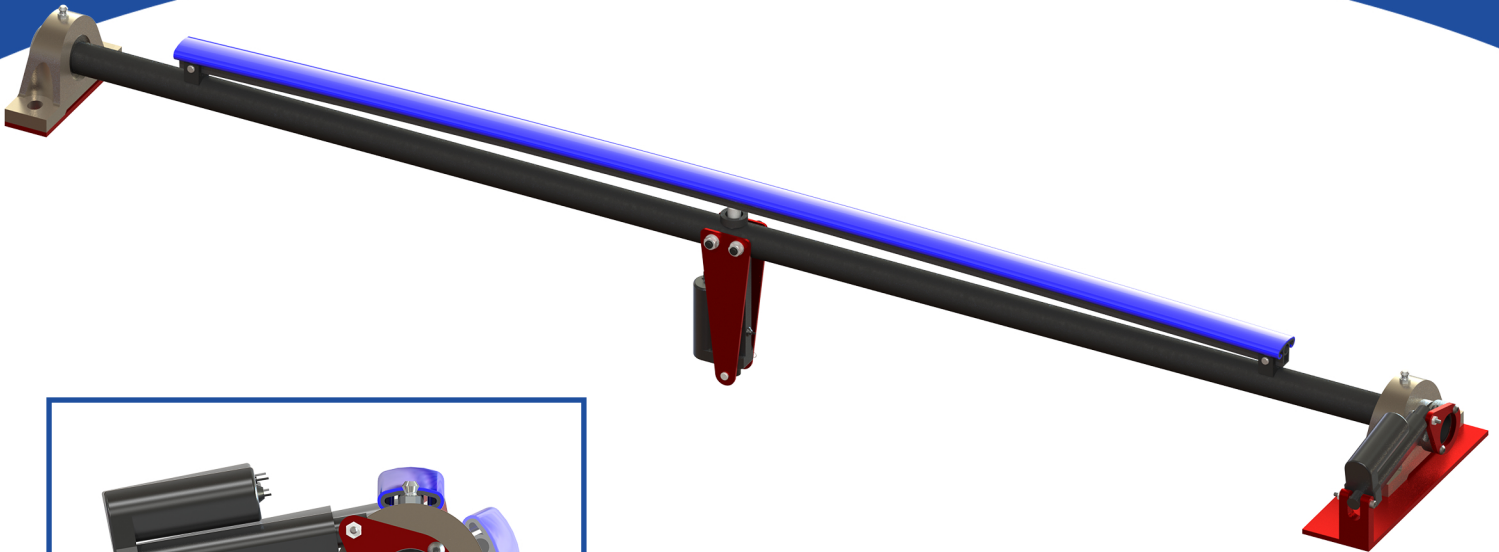

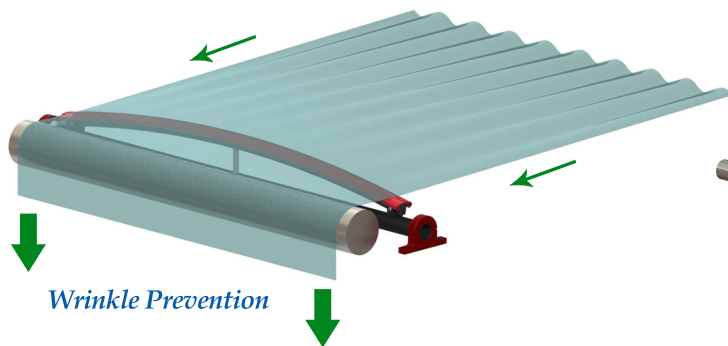

Image shows how the unit rotates based on controller inputs.

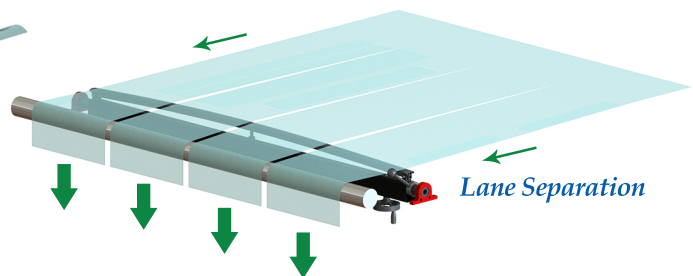

Pearl's rendition of bowed rollers. This new capability allows operators to quickly change the bow's operating parameters in hard to reach locations such as tight or high up places, or across wide webs.

Features:

- Easier operation and access due to controller
- Wrinkle free webs
- Will not scratch the film
- No tension required
- Self-cleaning
- Great for lane separation
- Various low Coefficient of Friction coatings available
- Custom built to your specifications

Wrinkle Prevention

Lane Separation
